

Large Scale Project: Hammelburg

➤ Photovoltaic Power Plant 0.83 Megawatts

Annual Output: 864,000 kWh
Reduction of CO₂ Emissions: 17,350 t/ 20 Year Lifespan
Total Contract Amount: 1.85 mio. Euro

Project Description

The solarhybrid corporation, acting as general contractor, systematically developed and built the photovoltaic power plant Hammelburg on agricultural land.

General Contractor

solarhybrid AG

Contractor/Project Developer

Dynna Solar
Hammelburg GmbH & Co.KG

Project Development

Privater Investor

Planing and Development

Enerparc AG

Installation

Conecon GmbH

Location

Hammelburg near Würzburg

Technical Data

Wattage Rating	0,83 MW
Solar Modules	ReneSola
Oscillating Inverter	SMA
Photovoltaic Mounting Technology	Mounting Systems
Site Parameters	2,12 ha
Construction Period	May – June 2010
